

1 Negotiate

IRIS will sit at the table with you!
(not literally for the time being)

Managing Strategies to Protect your Previous Knowledge and Results

Draft Contracts

Defining your Workplan Calendar and Budget!

Safeguard confidentiality, data, ownership and exploitation of Intellectual Property Rights

2 Validate

When the contract is ready, IRIS validates it with our legal Advisors

Who validates? (not necessarily all of them)

What is Intellectual Property?

You create valuable **Intellectual Property (IP)** with your research and development activities.

IP refers to creations of the mind: inventions, literary and artistic works, symbols, names, images and designs used in commerce.

Source: OMPI

Knowledge (IP) can be exchanged between organisations leading to improved use of said knowledge and to **innovation**.

Intellectual Property Rights are legal instruments that ascertain the ownership of a given IP and provide you with the right to prevent others from exploiting your IP without your consent.

How can you value your work?

To properly value Intellectual Property, it should be managed through the life cycle of your R&D.

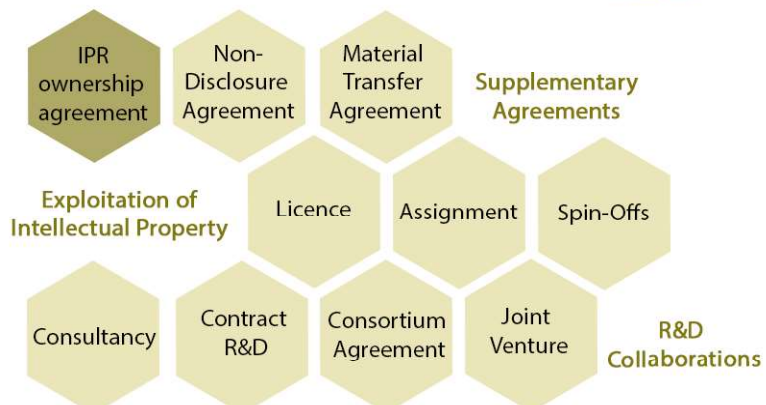

How do you do it?

Through Knowledge valorization Contracts!

Contractual mechanisms of knowledge transfer:

3 Sign

IRIS manages the signing of the contract between all Parties!

By printing the Documents and sending to all Parties

Collecting Digital Signatures

4 Execute

At the final stage, all the Parties will have a physical or digital signed copy of the contract!

We can all shake hands (then again, not literally at the moment, stay safe) and you are now able to use the contract to open a Cost Centre.
